Create "classes" CRUD module with required server-side validation.

1) Listing screen as attached snap shot (with document download option).

2) Add/Edit screen as attached snap shot.

**Note:**

1) In add screen college will be come from database table
2) Add more functionality for level and Levels will store in separate table with adding required table relationships
3) User pagination per page 5

Apply below server-side validation.

- Require all fields
- Email should be in email format
- Document should be less than 8 MB and allowed only pdf and docs files.
- Use table relationship and constraint which should be required in standard way.
